

HOW TO CLONE REPOSITORY IN GITHUB

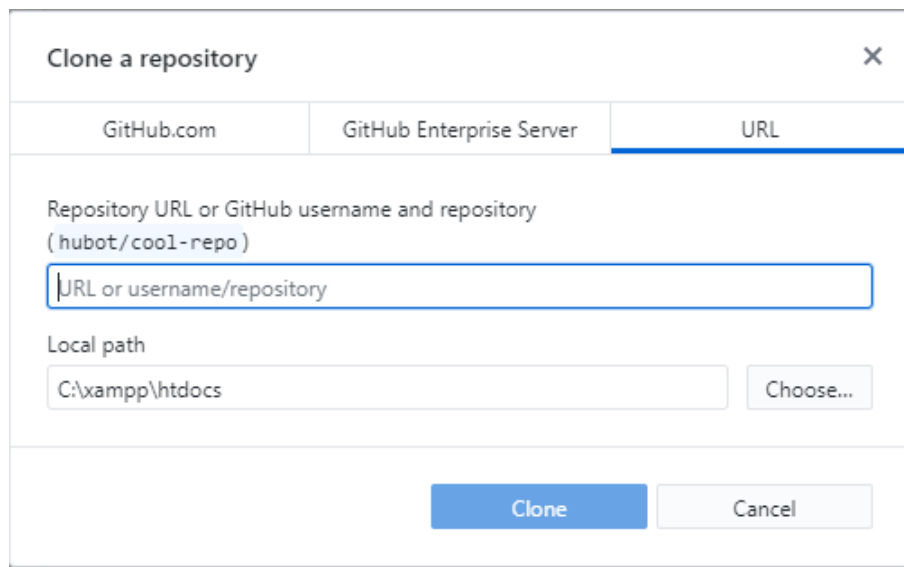

There is 2 ways to clone repositories in Github.

A. Github Desktop

1. Install the Github Desktop in your computer.
2. Open your Github Desktop and login your account.
3. Click File at the top of navigation, and choose Clone Repository.

4. Click URL bar, and choose your path first. For path, please set the path inside C:\xampp\htdocs

5. For URL, you have to copy the link inside at the Github page repository. Click the copy icon there to copy the link.

hamzah014 / keymanagementsystem

7.jpg	Initial commit	34 minutes ago
8.jpg	Initial commit	34 minutes ago

Clone with HTTPS Use SSH

Use Git or checkout with SVN using the web URL.

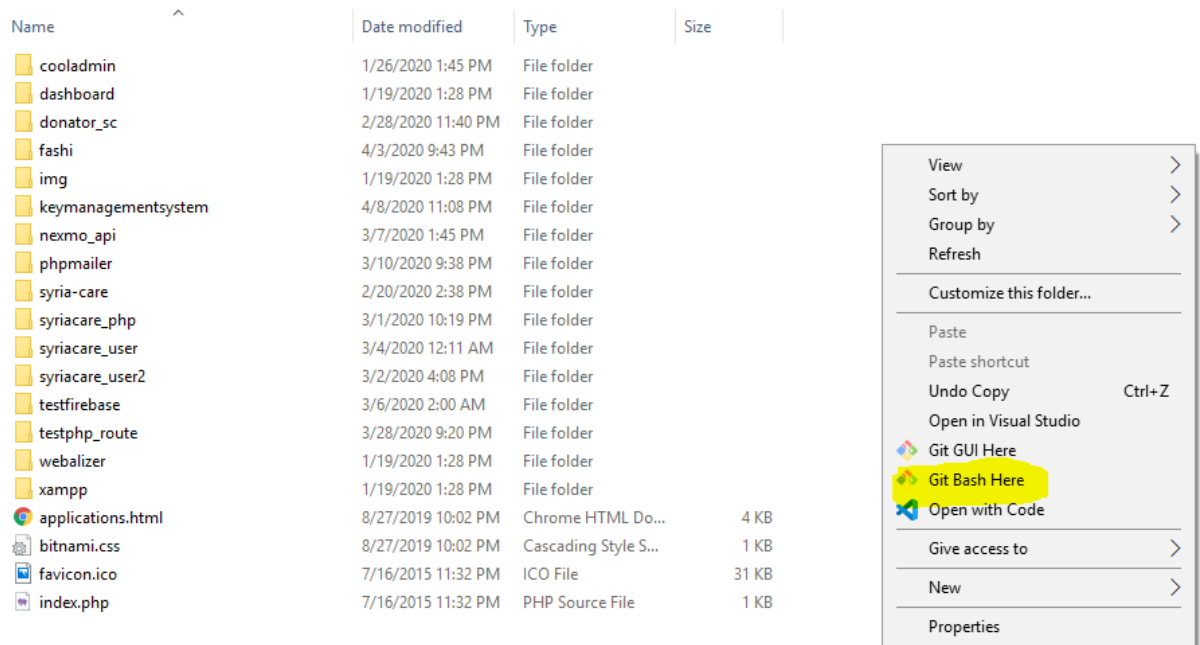

<https://github.com/hamzah014/keymanageme>

Open in Desktop Download ZIP

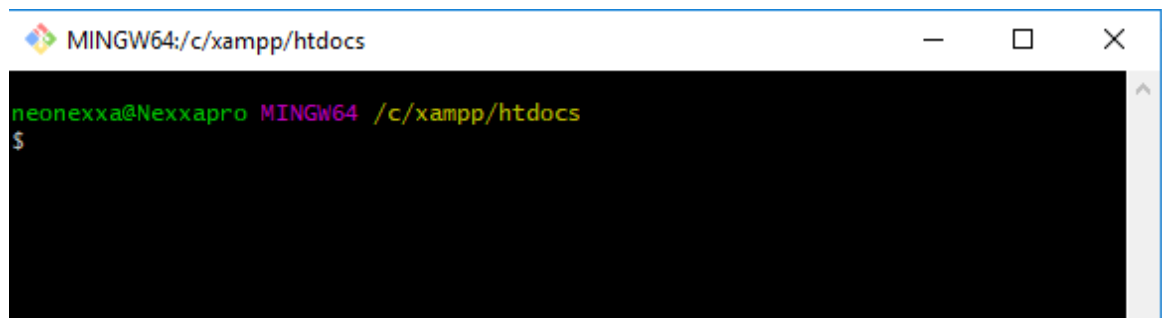

6. Paste the URL at URL input, and click Clone button.
7. Check your htdocs file, see if the file there or not.
8. Done 😊

B. Git Bash

1. Download and install Git Bash in computer. (<https://git-scm.com/>)
2. Or you can see this tutorial here to setup, <https://www.stanleyulili.com/git/how-to-install-git-bash-on-windows/>
3. After settle the setup, go to your C:\xampp\htdocs. Right click (at the empty space), see if there is “Git Bash Here”. If yes, so your setup is completed, if not you to re-install the Git Bash.

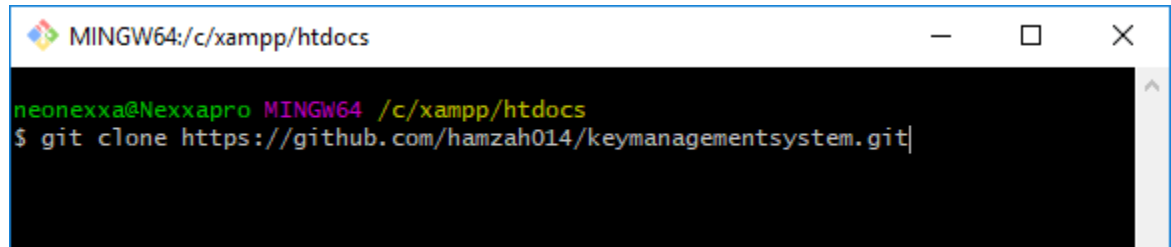

4. After you click, you can see theres something like CMD is popup.

5. To clone the repository, you have to code a lil bit.

git clone <your repo link>

A screenshot of a terminal window titled 'MINGW64:/c/xampp/htdocs'. The prompt is 'neonexxa@Nexxapro MINGW64 /c/xampp/htdocs'. The command '\$ git clone https://github.com/hamzah014/keymanagementsystem.git' is entered and the cursor is at the end of the line.

```
MINGW64:/c/xampp/htdocs
neonexxa@Nexxapro MINGW64 /c/xampp/htdocs
$ git clone https://github.com/hamzah014/keymanagementsystem.git|
```

6. Click **Enter** and check your file if **keymanagementsystem** is uploaded inside your htdocs folder just now.
7. Done 😊
